

BRAM SEBASTIAN PANGARIBUAN

Bekasi, West Java, Indonesia | +62 813-1915-7493 | pangaribuanbram@gmail.com | GitHub: KimoonTheCreator

PROFILE

An Information Technology Systems student at Institut Teknologi Bandung (ITB) with a creative and logical approach to problem-solving. Focused on Web Development, experienced in building modern, responsive, and scalable web applications using HTML, CSS, JavaScript, React, and Tailwind CSS, while applying clean code and modular development principles.

EDUCATION

Institut Teknologi Bandung
Undergraduate Student of Information Systems and Technology, STEI-K

SMAN 103 – Jakarta Timur
Science

ORGANIZATIONAL EXPERIENCE

Himpunan Mahasiswa Informatika (HMIF) <i>Member at Capital Catalyst</i>	<i>September 2025 - Now</i>
Kadwil STEI-K 2025 <i>Mentor</i>	<i>December 2025</i>
GIM ITB Member	<i>April 2025 – Now</i>

PROJECT

Hospital Management System
Algoritma dan Pemrograman — 2024
C Programming

- Engineered a modular hospital management system with clearly separated Doctor and Manager components.
- Designed system workflow, validation flow, and error-handling mechanisms to ensure data consistency.
- Performed performance optimization and debugging to enhance system stability and maintainability.

Currency Converter Website
ARC Project — 2024
Express.js, JavaScript, API Integration

- Developed a full-stack currency conversion web application using Express.js and RESTful API integration.
- Implemented real-time exchange rate retrieval from external APIs and built dynamic conversion logic.
- Designed and generated interactive trend visualizations based on historical exchange data.
- Deployed the application and configured environment for stable production access.

Overcooked-Inspired Game
Object Oriented Programming — 2025
Java Programming

- Built a multi-module game application using OOP architecture, applying encapsulation, inheritance, and polymorphism.
- Designed gameplay mechanics, event handling system, and core game loop for smooth user interaction.
- Structured codebase for scalability and feature expansion.

LaTeX to Word Converter Web Tool
JavaScript, React, Tailwind CSS

- Designed and developed a web-based tool that converts LaTeX expressions into Word-compatible formatted text, eliminating symbol corruption during document transfer.
- Improved document formatting accuracy and reduced manual correction effort for users.
- Implemented a custom parsing engine to process LaTeX syntax ($\dots$, $\sqrt{}$, fractions, equations) into readable document text.
- Built responsive UI using React and Tailwind CSS, optimizing usability for academic and research users.

PROFESSIONAL EXPERTISE

Core Competencies:

- Web Development (Frontend & Backend Fundamentals) with diverse programming languages and frameworks
- Full Stack Development
- Secure Coding & Cybersecurity Fundamentals

Achievement

- Participant — ARKAVIDIA ITB 2024
- Participant — COMPFEST UI 2024

Technical Skills

- Programming Languages: Java, Python, C, JavaScript
- Web Technologies & Frameworks: React.js, Node.js, Express.js, HTML, CSS, Tailwind CSS
- Database: MySQL, PostgreSQL

Softskills

- Communication
- Time Management
- Team Collaboration

- Problem Solving
- Languages: Bahasa Indonesia (Native), English (Professional Working Proficiency)
